Lenovo Yoga Book Windows 10 1803 Professional.rar This article provides a guide on how to update the Lenovo Yoga Book from Windows 10 1703 Professional to Windows 10 1803 Pro. Lenovo uses a customized operating system for its devices hence why this guide is required. I have been having trouble updating my laptop from windows 1703 professional to windows 1803 professional due to an error that says "this product key can only be used on lenovo products. Attempting to use it on a non-lenovo device will result in a downgrade to windows 10 professional ." The problem is easy to fix if you know what you are doing. You must make sure that when you run the update program, you select the following options: This will guarantee that your Windows 10 1703 Professional Lenovo Yoga Book will be updated to Windows 10 1803 Professional.

After the Update please refer to this Page how to Restore your System! http://www.lenovoblogs. com/2016/06/17/windows-10-update-notes-and-checklist/ Carrying a charger is useless now. But if you carry the USB Cable you can update your Lenovo Yoga Book from Windows 10 1703 Professional to Windows 10 1803 Professional.

I've been trying to update my Lenovo Yoga Book from Windows 10 1703 Pro to Windows 10 1803 Pro and I'm getting an error stating "this product key can only be used on lenovo products. Attempting to use it on a non-lenovo device will result in a downgrade to windows 10 professional " . The solution is easy and works every time. Just make sure you go to "Settings" and then click on "Update and Security". Choose "Advanced Options", select the option to "Update this PC" and then choose the option: "Get updates for other products when my PC is updated. Choose the following: All features and drivers (recommended) On Sep 22, 2016 at 5:20am, Ovi Kramnik said: Hello. This error is caused by a lenovo bug in the installation software. To fix it please reinstall Windows 10 with this method: The workaround works fine... But when i reboot my computer afterwards i got stuck in a loop with "bootmgr is missing ... press a key to reboot" and a blinking cursor. Lenovo wants you to pay them for a fix. The fix is very easy: go to Boot, choose USB Boot, press F11, choose the Windows 10 1803 ISO as your boot source and it will boot from it without any problems. To make the USB Boot Device you need a flash drive with at least 16GB free space remaining on it. That's because the Windows 10 1803 ISO file is about 3GB in size.

Detailed written tutorial for this workaround: https://boggeff.
